# Setting Up Schedules is Easy!

HunterDouglas

Step 1: Create an Account and Accept Ownership

1. **Download App**

2. Open the app and select "Don't have an Account?"

3. Follow the instructions to create your account.

4. Click on the invite link sent to you from your PowerView installer.

5. "Accept Ownership" and follow the instructions.

Schedules

You don't have any Schedules created yet. Create Schedules to run Scenes automatically based on days and times.

Create Schedule

→

Dashboard   Rooms   Scenes   **Schedules**   More

Open the App. Go to the "Schedules" tab and tap "Create Schedule."

To create a Schedule, select a Scene. Then select a time of day when you want your Scene to run automatically.

Now your shades will automatically move on the days and times you scheduled.

Make Every Day Better with Schedules

- Swap your alarm for a gentle wake-up by scheduling bedroom shades to open.

- Prevent sun glare from fading flooring and furnishings by scheduling living room shades to close in the afternoon.

- Enhance security by scheduling shades to raise and lower at set times, giving your home a lived-in look while you are away.

- In summer or warmer climates, schedule shades to close during the day to keep your house cooler, so your A/C does not have to work as hard.
